RE: **Letter of Reference**

To whom it may concern,

I have had the pleasure of working with Mr. Bill Bobrick on a State of Alaska road building project, The Old Glenn Highway – Fire Lake to South Birchwood Loop Road. This was a large scale, 2 year project in the \$10,000,000.00 range with many challenges related to storm water issues. Mr. Bobrick's role was lead SWPPP/stormwater inspector for the Pruhs Construction Company. There were many unique features on this project, the most challenging being a fish bearing stream diversion and road construction within several feet of Lower Fire Lake. Mr. Bobrick was instrumental in providing ideas, solutions and follow up to the challenges presented by these features. An inspection by the State of Alaska's Central Region Erosion and Sediment Control Advisor of the projects SWPPP records indicated the records and BMP's were in excellent condition.

I found Mr. Bobrick to be an excellent Inspector, one who took his responsibilities seriously and maintained a high level of professionalism while at the same time injecting a modest level of good humor which was much appreciated. I would welcome working with Mr. Bobrick at any time in the future.

Thank you,

Mike Morris
Project Engineer
